Josh Francisco

Blockchain Developer / Auditor

Enthusiastic Web3 Developer eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of smart contract vulnerabilities and trained in front-end deployment frameworks. Motivated to learn, grow and excel in the blockchain security field.

Projects

05-2022 Anti: A minimal social media platform build atop of the Polygon chain and using IPFS to store back end information. Built for the Gitcoin 2022 Hackathon with a fellow developer with Moralis.

04-2022 Walletwrapped.info: Website that communicates with the etherscan API to pull information about user's Ethereum transaction history and their NFT statistics.

01-2022 Hardbreach: First person strategy game developed for part of a game jam serving as the lead programmer alongside a 3D artist/designer.

Certifications

2022   ISTQB Advanced Software Test Analyst

2021   Unity Certified Associate Programmer
